Dear Jim:

Enclosed are 4 photostats and 2 xeroxes of photographs we are considering for possible use along with our U-2 story. The problem, as you know, has been to find the "correct" model of U-2--the one that would have been in use during the missile crisis. Each stat or xerox has been assigned an identification number. Carla Davidson, one of my colleagues here at American Heritage, has taken over this story while I'm away and will expect to hear from you as to which of these models we can use. Her phone number is (212) 399-8969. She has the photos here, and since each of them has been given the corresponding identification number as the stat or xerox I've sent you the pictures can be referred to as simply A, B, etc. This seemed the best way to avoid error or confusion. By the way, the photos that I've xeroxed--#E and #F--are CIA pictures. If there are color or black and white prints readily available, please send them along as soon as possible. Should we then decide to use either, we already have material on hand with which to make layouts and can then arrange to get color transparencies.

My many thanks for your kind assistance. It is very much appreciated.

Yours truly,

Devorah
